For Immediate Release July 31, 2023

Robert F. Kennedy Jr. is running for the Democratic nomination for President. We at American Values 2024 are delighted that he is following in his father's footsteps, and

we intend to fully support Kennedy in his race. We hope you will too. – [American Values 2024.Org](#)

"In recent years, we have seen a complete abandonment by the Democratic Party of any criticism of the pharmaceutical industry, except for too high prices. The most draconian policies, supposedly to counter COVID, were greeted by almost all Democratic elected officials with either wild applause or silence. Kennedy's courageous run demonstrates to everyone that the Democrats still have a conscience and the courage to fight the drug industry and the bureaucrats. Hopefully, Kennedy's run will embolden other Democrats to come out of the pharmaceutical closet and take a stand. If we are going to achieve long-term goals of completely reforming the health systems in the United States, we will need allies in both parties. No single party will be able to do it alone.
